CEO Message

I feel delighted to welcome respected visitors on our company profile. Apart from providing background information and statistics on our organization, our capabilities and the services that we provide, the profile will give visitors an insight into how we have evolved over the years into what we are today.

We certainly have come a long way from being a small producer of mosaic tiles in the 2016 to currently the largest producer of Terrazzo mosaic tiles and pavers in the region. The long journey has not been without its toil and pain. But we at 3A Tiles regard every obstacle in the path as a challenge to our own capabilities and an experience in a perpetual learning process. Our achievements have been based on the time tested principles of loyalty, dedication and discipline within our ranks and the effective utilization of experience gained and resources developed within our inventory. These are all harnessed by the project management incorporating planning, monitoring and estimating tools that we have developed on our own in-house!

This coming decade is truly going to be an exciting one for us. We have long aspired to be a largest well know tiles producer, and we are now well-placed to achieve that target within the next few years. In this modern world of shortening boundaries and rapid dissemination of information we can proudly claim that we are already well on our way towards globalization being active in several countries and with a number of multinational personnel. Other than moving into new territories we shall also prepare ourselves for entry into new sectors such as buildings and mosaic insulator, etc. in order to build up our clientele base. We will not however, abandon our traditional areas of business but rather enhance our capabilities in the manufacturing and plant construction & services sectors.

Despite standing the above, our steadfast commitment towards the timely delivery of quality projects to our clients from healthy and safe working environments remains resolute.

Thank you for visiting us. We hope it has been useful and we look forward to serving you in the future.

Ashraf Hameed
CEO

Our vision

“To be on the top with Quality availing the opportunity whatever comes in our way.”

Our Mission

Our mission is to bring value to Construction and Development by offering Economical and Aesthetic flooring and pavement solutions.

We do this in several ways:

1. We provide technical information and artistic advice.
2. We make premium mosaic materials available to amateur crafters at a reasonable price.
3. We avoid kits which encourage people to make copies of "arts and crafts" junk.
4. We exhibit examples of mosaic art made from various materials, including low-cost materials available locally.

"Make it your way, and it will be genuine art in the highest sense of the word."

Ashraf Hameed
CEO

Profile

3A Tiles have been a pioneer in the flooring industry right from its establishment over 3 decades ago. In a modern environment, 3A Tiles Terrazzo Mosaic feature in Home, Offices and perfect for both Residential and Commercial spaces.

3A Tiles offers number of traditional as well as modern sizes and shapes. The Terrazzo are also suitable for applications with anti-skid and anti-fungal requirements. A 3A Tiles has a large array of patterns, which make large expanses of modern paving look like pieces of art. Our experience in the Production of Terrazzo Mosaic is now being applied to the growing demand for special fittings at floor junctions and pedestrian systems. We have a factory in Sheikhupura. Our marketing network has touched building and development Projects all over Pakistan.

We have always strived to be a step ahead in manufacturing standards and our long list of clients is a testament to our efforts. Manufacturing of our products is done using state of art technology and break through automated machinery. Paving presents itself as an idea solution for flooring with long lasting beauty and strength with significant savings. Our experienced representative values the opportunity to be included in discussions, regarding designing and other specifications for customizing your needs. We manufacture Terrazzo ranging from 25mm to 35mm (Thickness), strength from 5000 PSI as per Pre-specified requirements. 3A Tiles offers a huge range of mosaic tiles and supplies specifically for mosaic artists.

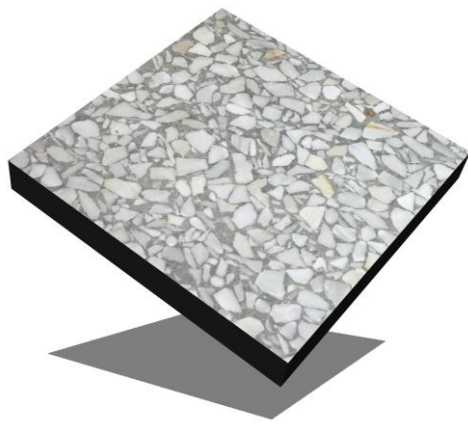

On our profile, you will find an extensive library of FAQ's as well as an assortment of free patterns and substrate templates to learn how to make mosaics. Our inspiring Gallery of Mosaic Art features beautiful mosaics from some of the finest professional artists. Since 2016, 3A Tiles has built a solid reputation for the best prices, best quality, best value, and most reliable service of any mosaic tile on-line store. Our mosaic tiles are available at both the retail and wholesale level. We see ourselves as being an all-things mosaic art supplies and fine craft supplier. Mosaic art supplies are our business... our only business.

What is Terrazzo Mosaic Tiles?

Terrazzo Mosaic floors commonly uses marble stone chips bind in cement medium to provide aesthetical floors with affordability and durability. It has long been followed since the Greek period and it has now been brought in the building material industry as a name synonymous to Durable, Economical and Aesthetic Floors with long life.

Small pieces, normally of abstract shape, of stone or glass of different colors, known as tesserae, (diminutive tessellae), are used to create a Terrazzo tile in any color medium.

The term for each piece of material is Tessera (plural: tesserae). The term for the spaces in between where the grout goes is the Interstices. Andamento is the word used to describe the movement and flow of Tesserae. The 'opus', the Latin for 'work', is the way in which the pieces are cut and placed varies and is known.

Results can also be seen on website <https://civil.uet.edu.pk/concrete-laboratory-reports1/>

- * as engraved on the specimens (if any)
- ** BS3921 requires average of ten clay brick samples for crushing strength and water absorption
- *** BS5328 requires mean of two cube sample strength at 28 days as characteristic strength
- **** ACI318-08 requires mean of two sample (6"diax12" cylinder) strength at 28 days as compressive strength

Note: Above results pertain to the unsealed samples supplied to the laboratory

- The laboratory is not responsible for sampling, originality and construction conditions (such as mix proportion, w/o ratio, compaction, curing and quality of ingredients)
- The test results are recommended to be interpreted in the light of above factors by the engineer.
